Round Lake Fruit Farm

Strawberry Specialists
High Grade Plants

Jackson, Mich. 191...

Dear Sir or Madame:

HAVE YOU TRIED THE NEW EVERBEARERS?

Do you regard them truly the most wonderful thing in horticulture that ever happened, and what it means for the family garden, with strawberries fresh from the vines every day throughout the summer and fall? Would you give them up for what they cost you, or for ten times what you paid for the plants?

OR ARE YOU DOUBTING IF IT CAN BE TRUE?

If so, get into the wagon and we'll take a ride to Round Lake Fruit Farm, and we guarantee you will soon be getting busy for the greatest pleasure and profit growing the new, genuine, sure-enough everbearing strawberries offered in this catalog.

Yours for all that makes life worth living in country or in town,
C. N. FLANSBURGH & SON.

Warsaw, K. Y., 3/17/15.—Enclosed find order and remittance. Your plants are the best I have ever received from any one. Your plants are always strong and healthy and well rooted, and received at the proper time for best results. Always true to name, and nearly always more than I had paid for. With kind regards, etc., J. J. PAYNE.

Watertown, N. Y., 4/26/15.—I am going to take a few minutes to tell you what I think. I received the plants promptly on time. I liked that part of it. They were in first-class condition. They were the best rooted plants I have ever received from any one, and every one is growing fine. It is a pleasure to deal with you. J. E. HAWVER.

We Want to Please in every way we can as we trust to be regarded always in return as reliable, dependable and up-to-date. That so many of our customers take time and pains to write us their good will and best wishes is highly gratifying to us. We thank you kindly, one and all.

Twenty-Eight years growing strawberries.

*There's something doing, so they say,
At Round Lake Fruit Farm, every day.*

The New Everbearers

EVER before have the everbearers produced so heavily or better demonstrated their ability to withstand extreme adverse conditions than in the season just passed. Through sunless, muggy days with flooding rains—through cold and hail and frosts, they have made good.

These plants set out last April, disbudded until well established, have borne fine fruit while making plants from August 1 to cold weather. Now mulched and dormant they will again produce next June—but this time—a full crop all at once, like June varieties, unless disbudded.

We practice plowing under after this June fruiting, depending on a new setting out of all varieties each spring, taking our greatest profits from the everbearers as a rule, in the finer fruit and higher price secured in summer and fall, before the first snow flies. This way they have produced for us—at least a fine new automobile that we use for quick delivery of fruit to the city and as quick return, for since these everbearers have come to stay there is something doing every day.

Do you know of anything that grows, more interesting than strawberries—more profitable—more popular? The day-dream of the tired worker in the city for the good time coming when he may enjoy his garden, for doctors, lawyers, merchants, everybody in country or in town. What then of these new everbearers? Some folks declare that plants can't talk, or think; but stop your work a moment and listen to their gentle whisperings. I am the new Progressive, and this our cousin is Americus—and there Superb and Francis, Iowa and Productive. Since the world was, we have been waiting for—the day, for our place in the sun. We came not to supplant, but supplement our other cousins, the truly worthy June varieties, and extend the fruiting season, was it not foretold? For you we don our robes of living green, and deck ourselves with blossoms white as snow, and nod and beckon you with every passing breeze. See how the dewdrops sparkle on our foliage, the red ripe berries and the growing fruits. Are we not fresh and fair this bright sunshiny morning? We come to make you glad, and others glad, wherever we shall go. There is a mission to fulfill. Let everybody know.

If you ask us, which of these everbearers is best? That is hard to answer. Each variety is distinct in habit of growth and in fruiting habit, in summer and fall, and in the spring. As a class they are distinct, in that some plants will make but few if any runners, no matter what the weather or variety, while others make abundance. All are hardier than the June varieties and more productive. As ever we are breeding each variety for the ideal, and they are growing better every year.

As commercial growers we shall depend for the most part on June varieties for June, carefully selected, with the everbearers to round out the season, while others will grow everbearers entirely, especially for the home garden, assured that they cover the entire season from the first ripe berries in the spring. See Progressive—the earliest of all on year old plants—with the same and others next fall from plants set out this spring. Strawberries for the table every day until the ground freezes. Within

the memory of man nothing more wonderful in nature has appeared than these new everbearers—and excepting only the potato—nothing that is destined to prove more valuable.

It is well to try them all, if only a few plants of some—judging for yourself while keeping a watch out for the newer ones. We have many here on trial as well as June varieties. Whenever or wherever a truly better one appears be sure we will have it for ourselves and for our customers.

FOR DESCRIPTION OF VARIETIES including the everbearers see **OUR SELECTED LIST**—in alphabetical order.

A Special Offer

To any who have not yet tried our Everbearers.

For each dollar, cash with order, for any of our plants at listed rate, received before April 1, 1916, we will include 10 cents worth—our selection—of the everbearers, free—if mentioned in the order.

For those who have the everbearers we will include instead 3 plants of Kellogg's Premier, or 4 of Early Jersey Giant or like value in any of our new varieties at dozen rate—if mentioned in the order.

Regarding the everbearers, kindly mention varieties most desired—assured we want to please and will gladly send your choice if still in surplus.

To advantage by this offer it is necessary to observe the terms and mention Special Offer in your order.

OUR GUARANTEE, TERMS, ETC.

Our plants are **fresh dug** at time of shipment, from new beds, carefully trimmed, resorted, to **best grade only**, and tied in bunches. Good count and **true to name**, and are put up with finest moss in packages, if to go by mail, or in market baskets lined with moss and oiled paper or light ventilated crates, to carry safely by express at lowest rates.

We guarantee our plants to reach their destination in good condition by express or mail to all parts of the U. S., with the understanding that we shall not be held liable for more than the original cost of the plants in any case. Should a package go astray, be damaged or destroyed en route, plants missing, or any error we have made, please notify us at once.

All orders promptly acknowledged and notice sent when plants are shipped, except where forwarded at once by return mail. **Our Certificate of Inspection is attached to every shipment.**

Canadian shipments must go by express, as plants from the United States are excluded from the mails by the Canadian authorities.

We begin our shipment south as soon as we can dig in spring, usually about April 1, sometimes in March, and push the work as fast as possible with a view to send out every order just when it is wanted. We like to have our customers say when, when ordering, or say ship when notified, and then let us know a few days in advance. When orders are to "ship at proper season," we know what it means and plan accordingly. **We do not substitute without permission.**

Terms: Cash with order, but orders will be booked to hold the plants if part payment is enclosed, the balance to be sent before shipment. Remittances may be sent by postoffice or express money order, bank draft or check, or small sums in one or two-cent stamps. **A check is often more convenient** for our customers and by courtesy of our bankers is equally acceptable with us.

We Want That Trial Order

Number of Plants Required to Set Out One Acre

1 by 1 foot, 43,560	4 by 1 foot, 10,890	6 by 1 foot, 7,260
2 by 2 feet, 10,890	4 by 2 feet, 5,445	6 by 2 feet, 3,630
3 by 1 foot, 14,520	5 by 1 foot, 8,712	7 by 1 foot, 6,122
3 by 2 feet, 7,260	5 by 2 feet, 4,356	7 by 2 feet, 3,111

FALL SETTING And Our Rates For Fall

Our best advice is—order now, and have your plants come in the spring, the earlier the better, when the plant is fully grown, matured and dormant, while the soil is moist and cool, and when there is more favorable weather generally.

Plants grown between rows in an old fruiting bed are to be avoided. Most growers of only new bed plants refuse to sell them in early fall—since for each plant big enough to sell, others are destroyed that would be good ones later. They are safe enough to set, however, when there is plenty of rain, or where they can be irrigated.

OUR RATES IN FALL We can usually supply most varieties in small amounts after **September 15, at our listed rate per dozen, and at one-half more than listed rate per 100.** If wanted in larger quantity later in the season, write for price on variety and the amount of each desired.

Residence of C. N. Flansburgh, Round Lake Fruit Farm, R. 7, Jackson, Mich. The road from Michigan Center lies on the other side of the hedge at the right between the house and the grove. Beyond the grove, a portion of the lake shows in the picture.

Read Our Little Catalog All Through

OUR SELECTED LIST IN ALPHABETICAL ORDER

(Per.)—For Staminate or Perfect Blossoms. (Imp.) for Pistillate or Imperfect Blossoms.

ABUNDANCE (Per.) The new Fig Type strawberry originated in 1909, with H. J. Schild, the originator of the fig type strawberries, and introduced in 1913, with photograph of a quart box of berries showing extraordinary large sizes. Parentage: Indiana, Red Dawn No. 19, Moore's Early Ionia Market No. 1, Parker Earl No. 27.

So good have the fig type berries proved (Black Beauty and Grand Marie) that the demand for plants of the new Abundance, left us few to fruit in 1914, and none at all last spring after we had made our planting, but we have reasons to believe it is a good one, like the others.

AMERICUS EVERBEARING STRAWBERRIES

AMERICUS (Per.) (Everbearing.) One of the best known and most prominent of the new everbearing recently introduced. A seedling of Pan-American and Louis Gauthier, from the same batch of seedlings as No. 1 (Francis), foliage a little larger, a shade lighter in color. A good heavy root system; a better plant maker. Americus is strongly staminate. Plants are strong, healthy and deep rooters. The fruit is firm, medium to large in size, light red, heart shape, of fine texture, quality extra good; fruit stems stout, holding large berries high from the ground. Unless repeatedly disbudded it will bear constantly from June to November. A fairly free plant maker and young runner plants begin to bear as soon as they begin to root.

We were sold out of this again last spring as also others of the everbearers. In fact if we could have supplied one-half as many plants of the leading sorts—in a wholesale way—to nurserymen who have applied to us already, we should not have them now to offer in our catalog. Americus is all and more than has been claimed.

AROMA (Per.) A popular standard late market variety. Fruit large, roundish conical, bright, glossy red, firm and of good quality.

AUGUST LUTHER (Per.) Well known standard early market. A vigorous, healthy grower, productive and reliable. Fruit of good size, bright red, firm, and good quality. Our long time favorite, first early for home or market.

BLACK BEAUTY (Imp.) The originator says: "This plant is the result of eighteen years' scientific breeding terminating in one of the grandest creations in the strawberry world. Berry rich, aromatic, sweet, firm and large, conical round, even and smooth, free from core, dark red to center and so rich in sugar and essential oils that it will remain sweet when left hanging on the plant several days after fully ripe. A large, healthy, well balanced plant of the multiple crown type, a splendid plant maker and very productive. Season late."

This and Grand Marie (see further on) are the new varieties termed "Fig Type." Both good. See also the new Abundance heading this list. We were sold out of all of them last spring.

COLUMBIA (Imp.) Fruit large, wedge to roundish conic, bright scarlet, glossy and attractive, firm and of good quality. A fine late market variety.

EARLY JERSEY GIANT (Per.) New. (Van Fleet No. 10.) Ripens with the very earliest. Berries very large, brilliant scarlet-crimson, conical with pointed tip, colors all over at once. Large light green calyx, exceedingly showy and attractive. Blossoms open rather late and staminate. Plant a strong grower with large leaves on long, pliant stems and a heavy yielder. The largest and best early variety. (Introducer.)

Our plants of this and Late Jersey Giant (Van Fleet No. 14) were received from the introducer. First offered to the trade last spring at \$1.50 per dozen and \$10.00 per hundred.

Above is from our last year's catalog. We find it as claimed except it was not quite so early to ripen at its first fruiting here last year. Try it. We predict it will prove among the most valuable.

We copy the entire from our 1915 catalog. With another fruiting we are regarding it a prize indeed—one of the largest and finest early berries we have ever grown. We shall reset it largely as we can for early market.

EDMUND WILSON. (Per.) New. (Van Fleet No. 13.)—a strikingly unique variety. On good soil the plants attain a height of twelve to fifteen inches with a spread of fully a foot, and are enormously prolific. The berries are as large as small apples, form globular or bluntly heart shape, of deep maroon color with smooth surface and quite firm. Perhaps the richest in sugary lusciousness of all. Ripens in midseason. (Introducer.) Not fruited here. Our plants received last spring have made a stocky, healthy growth.

FORWARD and ONWARD (Per.) New. (Everbearing.) Two new everbearers recently introduced by Samuel Cooper, the originator of Superb, and so nearly like Superb that though there is a difference of course, it will take a longer trial to determine just what. (From our 1915 catalog.) We want to add that whether from our manner of plant breeding—or for whatever reason—it is a fact that every one of the everbearers that we list have been producing finer fruit and more of it with each season since the first fruiting. Of the two, Forward has produced the most for us so far. Whether it is in them to outclass Superb remains to be seen. What we are after is a variety superior to every other variety of its type and let the others go. There surely are but few growers in the U. S. who have let go as many named and unnamed varieties in the past 25 years—and our list is still too long.

FRANCIS (Per.) (Everbearing.) One of the finest. Fruit large, handsome and attractive. An exhibition berry. A most persistent fruiter. The spring set plants bear so heavily that, as a rule, they make but few new plants, which also bear fine fruit, often before well rooted in the soil, so that unless repeatedly disbudded it makes few plants and mostly rather small.

FRANCIS EVERBEARING STRAWBERRIES

Francis is a wonder anywhere, but for the specialist it is a prize. Who that knows it has not had visions of a solid acre for the city market? We sold the plants last year at \$25.00 per 1,000; elsewhere they were \$75.00 per 1,000. We were sold out as usual. The demand has never been supplied. We have already booked a large quantity and can only offer it this year in small amounts. Try a few plants on strong, sandy loam.

GANDY (Per.) Well known late market variety, large and fine, but a shy bearer in some sections. Most growers now prefer the Stevens as similar, but more productive and reliable.

GIBSON (Per.) We regard this a good variety, not at all like the old Gibson, nor as handsome a berry, but better otherwise. More like Parson's Beauty in appearance and in other ways. Midseason.

GLEN MARY (Per.) One of the most reliable heavy croppers and a splendid grower of large stocky plants. Fruit large, dark red, sometimes a little rough and uneven, but not misshapen. A valuable variety for all soils and all seasons. A long season fruiter.

GOLDEN GATE (Per.) A fine variety, a good grower and abundant bearer of strictly fancy fruit, large wedge to roundish conical in shape, firm and of good quality. The only fault we find is when the berries lie unmulched the underside showing lighter color, sometimes almost white, in striking contrast to the dark, rich, glossy red exposed to sun and air. Clay loam is best for this variety—and plenty of mulching. Midseason.

GRAND MARIE (Per.) The fig type, mate for Black Beauty and described as follows: "A large, hardy plant with upright habit of growth and well balanced root system. Stolens strong, making an abundance of plants. Berry tapers to a point, even and smooth, firm and sweet, color dark red clear through, large to very large. Can remain on plant several days after fully ripe, remaining rich and sweet; of the nature of figs. Very prolific. Season medium to late."

HAVERLAND (Imp.) Very productive. Fruit large, longish conical to extra large, broad tapering and slightly flattened; light bright red, firm and good quality. A good grower and a long time standard market variety. A sure cropper. Season early to late.

HELEN DAVIS (Per.) We have come to regard this as one of the very best and most profitable varieties, and we are growing it largely as we can for the nearby city market. Helen Davis is a strong, healthy grower, and a reliable, heavy cropper of large fine fruit, crimson in color and good quality. A money-maker. Midseason to late.

IOWA (Per.) (Everbearing.) Plants large and thrifty—a satisfactory plant maker under average conditions—a little later than some others in coming into bearing—thus saving labor in disbudding—a heavy and continuous fruiter from August 1 to cold weather. Fruit medium to large—color scarlet, fairly firm and good quality. This variety has short fruit stems, while the foliage is exceedingly rank, serving to protect the fruit from frost and cold in fall, even when the ground is slightly frozen.

JOE JOHNSON (Per.) A new variety from Maryland, said to be very productive, of large size, fine color and good quality. A perfect table berry, a good canner and one of the best for shipping. Season late. Our plants received last spring have made splendid growth.

KELLOGGS PREMIER (Per.) Introduced last spring by the R. M. Kellogg Co., of whom we got our plants and who state that it originated in Illinois. That Edw. H. Riehl, who conducts a sub-experiment station for that state (heavy clay soil) wrote them that it outclassed every other early variety he had ever known. That it outclassed every other early variety at the Kellogg farm on sandy loam, etc., etc. In short that it was the earliest and the best early variety ever originated.

Aside from the abundant testimony, our own plants had made such remarkable, clean, vigorous and healthy growth that we wrote the Kellogg Co. for the latest word about it there, receiving their reply under date October 18, 1915, in part as follows: To begin with the Premier fruited earlier than any other of the extra early varieties. In the second place, the yield was beyond anything we have ever had from any variety except Kelloggs Prize. In the third place, the fruit was the richest in flavor and in form and color ideal, deep rich crimson to the center. A few of the berries were sent to St. Joseph, Mich., and were placed in the window of a bank in that city, with the result that an automobile load of people came clear over here (40 or 50 miles) to see the wonderful sight. One of the visitors was so much impressed that he made a second trip. We have had people here from other states come to see the Premier, and all unite in saying it is the greatest variety ever originated. Profs. Eustate of Michigan, and Steubenrauch of California, both declared that nothing in their experience had ever equaled the Premier.

We have a few thousand of the plants to offer by the dozen only.

KELLOGGS PRIZE (Imp.) One of our best varieties for market. The plants are strong growers and the fruit is large and fine and produced in abundance. It is said to be one of those varieties that grow better with each succeeding crop on the same vines up to three or four crops. We have never tried it out that way here, being well satisfied with the one crop and a new setting out each spring, as is our rule for all varieties. Midseason to late.

LA BON (Per.) (The so-called alfalfa rooted that we have been hearing about, to be introduced this year.) A new variety from H. J. Schild of Michigan. The plants sent us last spring were the longest rooted we have ever seen. Before me as I write is a La Bon plant with dried up roots that are still over three feet long, given me by Mr. Schild when on a visit to his place where I had gone last fall to learn more of the La Bon and other sorts that he is originating and developing, including several new everbearers.

Mr. Schild says: "This variety, No. 11, now named La Bon by the M. A. C., is extremely hardy and drouth-resisting, retaining its fresh and upright growth when other sorts droop and lop in extremely dry, hot weather. A strong, healthy grower and productive of large fine fruit with a firm skin, making it a good shipper and its quality is good, fruiting midseason," etc. In short a variety that cannot fail to interest our customers, and we are aiding in its introduction.

LATE JERSEY GIANT (Per.) New. (Van Fleet No. 14.) The latest of all strawberries and best late variety. It undoubtedly has blood of Gandy in it, but is superior quality; the berries larger, more brilliant color and produced in greater numbers; uniform large heart shape, smooth and glossy, firm and meaty. I regard it as the most beautiful strawberry I have ever seen, etc., etc. (Introducer.)

While not as vigorous a plant maker as the other Van Fleet varieties, it makes good rows for fruiting, and it is certainly a fine berry and productive. Very late.

MONROE (Per.) Originated with Joseph A. Morgan of Monroe Co., N. Y., for whom it won the \$50.00 Barry Gold Medal in 1912, offered by the Western New York Horticultural Society—(a three years test). First offered in our catalog for 1912, since when we have grown it, as also many of our customers, with much satisfaction. Monroe is a strong grower and plant maker. The fruit is large, dark red with a heavy green calyx, firm, of high quality and produced in abundance. Season second early and midseason, like Dunlap.

NORWOOD (Per.) Introduced in 1908 at \$10.00 per dozen and every year since then we have been sold out, except a few plants saved to fruit. Norwood reminds us of Marshall in many ways, but is a better grower and more productive and reliable. The fruit is large and handsome, more regular in form than Marshall and equally as fine flavor. The season is the same (second early and midseason). The bloom will stand more cold and frost than Marshall, which, like Jessie Sharpless and other old-time favorites, were always among to the first to suffer from a frost.

OREM (Per.) The latest of all varieties, coming in with Gandy and bearing an abundance of fine berries, even two weeks after Gandys are gone and about three times as many. A good grower. The berries are exceedingly large and smooth, light red, with yellow seeds and dark green calyx; very attractive. They ripen all over, holding their size best of any I ever saw, and are good keepers; can be left on the vines two days after they are ripe and still be in first class condition for market. While the above is the originator's description, it is almost identical with our own experience here. It is certainly the latest we have ever grown, and otherwise as claimed. A valuable variety.

PAUL JONES (Imp.) A seedling of Haverland crossed with Brandywine. Mr. Todd of Delaware, says: "One of the chief points of value of Paul Jones is its shipping qualities. Berries kept a week in a common house cellar were exhibited at the Worcester County Horticultural Exhibit by the side of fresh picked fruit, and the only difference in appearance was the added richness in coloring of the week-old berries. Three times it has taken first premium at these exhibits. It is fully a productive as Haverland or Sample."

"Paul Jones is a very vigorous grower and plant maker and is immensely productive. The fruit is large, much like Haverland in shape when that variety is at its best, but much more brilliant and beautiful in color and appearance."

This variety has attained a wonderful reputation in the east, and is none the less a favorite with us as with many of our customers elsewhere.

We Want That Trial Order—No Matter How Small

PENNELL (Per.) A vigorous grower and a sure and heavy cropper. The fruit is medium to large, bright red, firm and of the finest, richest flavor possible to imagine. A prime favorite for the home and a reliable, valuable market variety for discriminating customers who demand quality. Should not be allowed to matt too thickly. Midseason.

PRIDE OF MICH. (Per.) Fruit large, highly colored, glossy red, firm and of good quality. A good plant maker, vigorous, healthy and productive. Midseason.

PRODUCTIVE (Imp.) (Everbearing). Parentage Pan-American and Autumn. It is imperfect blossom and requires a perfect blossom, fall bearing variety alongside to fertilize its bloom. The plants are large with dark green foliage. It fruits considerably on new runner plants, the berries above medium in size; color light glossy red, heart shape, firm, seeds prominent on the outside. Mr. Cooper says: "I think this the most productive of any variety I have ever seen; that it will be used largely as a fall and spring berry; that on an average this variety in hills will bear a pint of fruit to each plant the first fall, a quart to each plant the following spring, and if the leaves are mown off after the June crop will bear another pint the second fall."

As grown by us in matted rows Productive is one of the heaviest croppers on year old plants in June—compared with June varieties—that we have ever grown, the berries almost identical in appearance with the old Bismarck strawberry, equally as large and fine and produced in even greater abundance. The fruit produced in fall is larger though not so much of it.

THE NEW PROGRESSIVE EVERBEARING STRAWBERRY
Quart Basket and Berries—much reduced in size

PROGRESSIVE (Per.) (Everbearing.) Originated in 1908 by Harlow Rockhill of Iowa, the originator of Americus, Francis, Iowa and others. Parentage Pan-American and Dunlap, the only plant saved out of 4,000 seedlings.

Progressive is the most vigorous and thrifty grower of all the everbearers that we list, "unless it is Superb," with tall, luxuriant foliage to protect the bloom and fruit from the hot sun and frosts. Practically every blossom makes a berry, and every berry makes a perfect fruit. A few too small to sell and many large, but mostly medium in size, dark red, fine quality, and produced in great abundance on the spring set plants and runner plants throughout the summer and fall.

We realize it would be an error for us to underrate or overstate a single feature

The Bigger Ones Will Come Later. Let's Get Acquainted

of this most important variety offered to our customers in 1913 at \$75.00 per 1,000 plants and selling to our competitors as well in large amounts. It is not the largest of the everbearers, running in size about like Dunlap. We call it the Dunlap of the everbearers, reminding us of that grand variety in many ways—both plants and fruit. There are still a few small berries, though growing better every year. Perhaps one quart in 50 if to sort them close, which we do not, they are all such perfect berries in every other way and the average size is good.

For the past two years Progressive has been the first of all varieties to ripen on our grounds on year old plants in spring—May 30 in 1914 and last year May 29—both times a week ahead of all other extra early sorts.

All things considered, Progressive is without a doubt the most important variety ever introduced—the most popular variety today. We could have sold every plant we had of it last fall. Nothing in the history of strawberries has ever equaled this demand for the leading everbearers, and especially for this.

REWASTICO (Per.) A new variety sent out by the W. F. Allen Co., and highly praised and prized by them as a splendid market variety, productive and reliable. Fruit large, highly colored, uniform in shape, quite firm and of good flavor. In short a variety of great value. The plants are strong, vigorous growers, sure to make good rows and the season is medium to late.

RICHMOND BEAUTY (Per.) A new variety from the State of Washington. Our plants were from a long time customer at Seattle, who wrote: "Just figure a variety that is superior to Marshall in every way. Absolutely the best thing out, at least here. The berries are exceedingly large, going nine for toppers, dark blood red, shine as if varnished, and lasted eleven days at the A. Y. P. Exposition at Seattle." Richmond Beauty is a seedling of Marshall but a much stronger grower. We have fruited it only in a small way until last year, when it suffered from the freeze of May 19, along with other sorts, but more than some. This was a fault with the old Marshall, tender in the blossom. We are telling you just how it was, but this is the first such telling damage to our berries by a freeze in many years—enough to injure many of the buds and blossoms that it did not kill outright, resulting in much imperfect fruit. About a dozen years ago we had a freeze that killed all bloom and buds outright, but the plants pushed out new fruit stems and we picked 2,000 bushels from something over a hundred varieties, with 325 bushels as the record of one day's picking. That was bigger business than we are doing now, or want to do. As a rule an ordinary late spring frost has few terrors for the old-timer but the prospect scares the new-beginner.

ST. LOUIS (Per.) A good grower. The fruit is large, light, bright red, nearly round, moderately firm and of good quality. The chief value of St. Louis to the grower is its earliness, ripening the bulk of berries for the early market when prices are high, while it easily ranks among the largest in size of berry and with the most productive as a cropper. Should not be allowed to mat too thickly.

SAMPLE (Imp.) Standard market, midseason to late. Fruit large, roundish conical, bright glossy red, moderately firm and of good quality; a good grower, productive and reliable.

SENATOR DUNLAP (Per.) One of the best and most popular. It succeeds everywhere and with everybody almost without exception, with the new beginner as well as with the veteran grower, but should not be allowed to mat too thickly. The bloom is perfect (self-fertilizing). The plants are small and very vigorous; will make good rows with very ordinary culture, or will return two-fold for every extra effort in intensive cultivation. It is productive and reliable. The fruit is good size, handsome and of fine flavor, fresh or canned; a good carrier and keeper. It ripens medium early and continues a long time in bearing.

SONS PROLIFIC (Per.) Originated in 1902. Of Aroma and Bubach parentage. Later introduced by the D. McNallie Co. of Missouri, with strong claims—the summing up of which was that Sons Prolific was the most ideal variety ever propagated and bound to supercede Aroma.

We have grown the Sons Prolific now four years and it certainly is a wonder for productiveness and big shiny berries. Midseason to late.

STANDPAT (Per.) (Everbearing.) The most productive of large fine fruit of any of the everbearers, or any other variety we have ever grown or seen. Originated by Harlow Rockhill of Iowa, and introduced by us in 1914, in limited amount, at \$6.00 per dozen and \$35.00 per 100, listing in our catalog last year by the dozen only.

We have decided to withdraw this variety for a time and none of our plants for sale, unless a few, now heeled in, at 35 cents each to customers not to be denied. Since 1912 we have been telling how this variety made few plants—too few to be successful with the trade—though we should grow it for the fruit alone. However, we have gone over all our rows, digging and heeling in a few hundred of the plants, selected for a type that we hope will prove better plant makers, etc., and more valuable to all.

STEVENS (Per.) (Stevens Late Champion.) This variety has become one of the most popular standard late market varieties in cultivation. It is a strong, vigorous grower, with tall, dark green foliage and long runners. The fruit is large and handsome, much like Gandy; equally as fine, as reliable and much more productive. One of our favorite varieties. Season late.

SUPERB (Per.) (Everbearing.) A seedling of Autumn crossed with Cooper. A healthy grower and makes runners freely. Our plants were from Mr. Cooper (the originator) who considers this the best of the everbearers.

Superb certainly is a valuable variety. Our customers who grow it in hills for fruit alone report high prices and great profits in the fall. As grown by us in matted rows for plants and fruit it is more moderately productive in summer and fall than are the Rockhill varieties—Americus, Francis and Progressive—but the fruit is always extraordinary large and handsome and pays us well if only for the fall—six months from setting out—but more than this, it produces enormously the next June on year old plants, ranking with the largest and most productive June fruiting sorts. As showing what we think of this variety, we are giving it more space than any of our June varieties, but the demand for plants is always more than our supply. We were sold out of it again last spring, and could have sold every plant we had of it last fall to bigger business if we would.

TODDS LATE CHAMPION (Imp.) Plants received in 1913 from W. S. Todd of Delaware, who offered it in his catalog for 1914 for the first time, heading his list as a variety of great merit. The plants are strong, vigorous growers. The fruit is large, light red, well formed, nearly round, and produced in great abundance. Season late.

UNCLE JIM (Per.) Our own introduction several years ago. Competitive varieties have come and gone, but Uncle Jim still holds—the best big berry of its type from Maine to California. The plants are large and stocky and make good fruiting rows. The fruit is large, high colored, fancy, quite firm for so big a berry, of good quality. A choice variety, productive and reliable. Midseason to late.

WARFIELD (Imp.) Well known canning and shipping berry, medium early and midseason. This and Dunlap make a good team.

WARREN (Imp.) Originated by S. H. Warren, and considered by him the best he ever grew, which ought to mean great things for this new berry to those who are familiar with the life work and character of that veteran strawberry specialist. It is said to be one of the largest and most beautiful. Not fruited here. (From our 1915 catalog.) We were sold out of this last spring after resetting it as largely as we could in view of the demand for plants this year and for our own fruiting, but we are expecting something extra when it fruits next June. This variety is a strong, though not a rampant grower.

WILLARD (Francis E. Willard.) New. Our plants were received last spring from the M. Crawford Co., the introducers of Dunlap and other famous varieties, and who say this new one will take its place among the very best.

Truly a wonderful variety. Fruit large and very beautiful, glossy red outside and red within, delicious in quality, juicy, sprightly and refreshing. A fine plant, a thrifty grower and a heavy cropper. The result of scientific breeding through many generations.

See Additional Varieties underneath Price List.

See also in our selected list such other well known standard varieties or any other that may have been omitted here for lack of room.

We Do Not Substitute Without Permission

but if you order late and are waiting for the plants, such permission may avoid delay, since we are liable to be sold out of something in your order. We are here to please and satisfy and not to disappoint you by returning orders if it can be helped, but more than all to do business on the level and we never take this liberty without permission.

Strawberry Plants by Parcel Post

Fourth Class Matter, Which Includes Plants

	<i>First Pound or Fraction</i>	<i>Each Additional Pound or Fraction</i>
First Zone—within 50 miles of Jackson, Mich.....	5c	1c
Second Zone—50 to 150 miles of Jackson, Mich.....	5c	1c
Third Zone—150 to 300 miles of Jackson, Mich.....	6c	2c
Fourth Zone—300 to 600 miles of Jackson, Mich.....	7c	4c
Fifth Zone—600 to 1000 miles of Jackson, Mich.....	8c	6c
Sixth Zone—1000 to 1400 miles of Jackson, Mich.....	9c	8c
Seventh Zone—1400 to 1800 miles of Jackson, Mich.....	11c	10c
Eighth Zone—all over 1800 miles of Jackson, Mich.....	12c	12c

Weight When Properly Packed For Mailing

Strawberry Plants—Dozen, 10 oz.; 100, 3½ lbs.

Raspberry Plants—Dozen, 1 lb.; 100, 5 lbs.

CANADIAN SHIPMENTS must go by express, as plants from the United States are excluded from the mails by the Canadian authorities.

SMALL PACKAGES weighing 8 ounces or less (of plants, bulbs, seeds, etc.); the only rate of postage to all zones is 1c for every 2 ounces or fraction thereof.

TO LOCATE ZONES—See post map at all postoffices or estimate distance in an air line from Jackson, Michigan.

Suppose you want a thousands plants direct by parcel post from Round Lake Fruit Farm to your door in the first or second zone—or within 150 miles of Jackson, Mich. As the average weight is 3½ pounds for each 100 plants or 35 pounds for 1000 plants, add 5 cents for the first pound and 1 cent for each additional pound, making 39 cents for 1000 plants; 23 cents for 500 plants; 9 cents for 100 plants.

If to the third zone or 150 to 300 miles from Jackson, Mich., add 6 cents for the first pound and 2 cents for each additional pound and so on according to the zone and the table of rates and weights above.

Small packages of 10 ounces or less go only at the old flat rate of 1 cent for each 2 ounces or fraction thereof, making 5 cents if for only one dozen strawberry plants, anywhere in the United States. Note that raspberry plants average to weigh 1 pound for a dozen plants and 5 pounds for 100 plants. We can send any quantity by parcel post in different packages if amount for postage is included at above rates, but for large orders it is often cheaper to order by express not paid.

Packages of plants will weigh more or less according to the varieties and amount of damp moss included to insure good condition anywhere in the United States, as guaranteed by us. These packages are collected by the mail man or taken promptly to the city in our car, where they are weighed and stamped by the officials for the different zones, and the sum total for postage for the load charged to our account.

Plants By Mail Our Specialty

PRICE LIST

These prices are by express, not prepaid. When ordered by Parcel Post add for postage to the different zones (to points within the United States only) as follows. See table of rates and weights on page 12.

Six plants of one variety at dozen rates; 50 plants of one variety at hundred rates; 500 plants of one variety at 1000 rates. (P) for perfect. (I) for imperfect blossoms.

CERTIFICATE OF NURSERY INSPECTION NO. 1553.

This is to certify that I have examined the nursery stock of C. N. Flansburgh & Son, Jackson, Mich., and find it apparently free from dangerous insects and dangerously contagious tree and plant diseases.

This certificate to be void after July 31, 1916.

L. R. TAFT,

State Inspector of Nurseries and Orchards.

Agricultural College, Mich., Sept. 3, 1915.

Binghamton, N. Y., 2/23/15.—Your recent letter, also the missing plants (Golden Gate) to hand. As I told one party about the mistake, I need not worry when I dealt with a firm of your stamp, and all of your plants were fine. My friend, Mr. Ward, informs me that he purchased 2000 of your plants and is much pleased. He was about to order elsewhere when I recommended you, and glad to do it. I have best results trimming St. Regis to a few canes, manuring well, and take a fine crop of large handsome fruit in fall, etc. L. F. BROWN.

Santa Rosa, California, 4/22/15.—The shipment of strawberry plants arrived in excellent condition. LUTHER BURBANK.

OTHER SMALL FRUITS

[Limited to the few varieties we have selected from the many for our own growing. If wanted in larger quantity write for prices.]

ST. REGIS EVERBEARING RED RASPBERRY New. A great sensation and a truly valuable variety, fruiting with the earliest in the regular season and also producing fine fruit in paying quantity in summer and fall. Our plants are the genuine. Price, 40 cents per dozen; \$2.00 per 100; \$12.00 per 1000.

KING, RED RASPBERRY (Early King) Large and fine, productive; one of the best. Price, 30 cents per dozen; \$1.50 per 100.

CUTHBERT RED RASPBERRY Large, late, hardy and productive. Price, 30c per dozen; \$1.50 per 100.

EATON RED RASPBERRY Largest, handsomest and most productive. Our own introduction. It makes but few new plants and few to spare this year. Price, 40 cents per dozen.

BLOWERS BLACKBERRY PLANTS Price, 40 cents per dozen.

Above prices are by express not paid. If wanted by Parcel Post figure 1 pound for a dozen plants and 5 pounds for 100 plants, adding for postage according to the zone or distance from Jackson, Michigan. See page 12.

DON'T OVERLOOK the Rural New Yorker offer envelope in this catalog, which you mail direct to them with your full address enclosing 10 cents, or kindly hand it to a friend if you are already a subscriber.

SEE ALSO The Country Gentleman folder in this catalog and note that in this case you remit direct to us and you will receive this famous weekly for a year. 52 times for \$1.00.

Good Seed Corn will be scarce this spring. See Kelley's Yellow Dent adv. outside back cover—and write him what is wanted before he gets sold out.

A LAST WORD ABOUT THE EVERBEARERS

Spurious varieties have been sent out by the unscrupulous. Be sure you get the genuine and you will not regret it. If we have a single customer who would be without them for ten times what they paid us for the plants we do not know of it.

Read Our Unsolicited Testimonials

Some Extracts from Letters from Our Customers

Hillsdale Co., Mich., 8/12/15.—I only lost one plant. I am more than pleased with your manner of dealing with customers—and I also thank you for the trial everbearers.
MRS. JENNIE GIBBS.

Lexington, Mass., 2/24/15.—I intended to write you before about your fine, healthy, vigorous plants in comparison with some I got elsewhere that you did not list. Yours were strong and well rooted, took right hold and made beautiful rows. The others were small, weak, sickly looking, and the few I did not throw away had little life and mostly died. The rows from your plants looked pretty. This time I want 200 Productive and 300 Superb. Will say when——.

LATER.—5/19/15.—Plants received and all set out. First-class plants as usual. Not counted yet, but I guess they are all there as I always get good count of you. They are looking fine and I am well pleased. C. H. LOTHROP.

London, Canada, 5/23/15.—The plants reached me in excellent condition. Thanks to your letter enabling me to get them from the customs immediately. We hope to surprise some of the people here who seem to know nothing about everbearing strawberries, and you will probably be swamped with orders from my friends next year.
ELNORA R. TURNBULL.

Roscommon Co., Mich., 5/16/15.—Received the plants May 10; was waiting at the station when they arrived in the finest condition. I wish now I had given you a larger order, as those I got elsewhere were mostly spoiled when received. Thank you for promptness and fine plants. B. H. PRESTON.

Ingham Co., Mich., 5/7/15.—Plants arrived in fine shape as they always do, from you. C. L. BASHFORD.

Oakland Co.—The plants (8000 Black Beauty and Grand Marie) were a fine lot and are doing fine. GEORGE REYNOLDS.

Platte Co., Mo., 5/21/15.—The plants were dandys and arrived in fine condition. Wish you could see them now. All alive and 7 to 10 inches tall. A. J. WILLIAMS.

Eaton Co., Mich., 5/24/15.—I received the strawberry plants all O. K. I wish now I had ordered more of you. L. B. COOK.

Alpena Co., Mich., 6/31/15.—The plants got of you did fine—as your plants always do, etc. G. W. WAGONER.

NOTE.—Later in the season Mr. Wagoner came to look us over and to see our everbearers, leaving an order for several thousand of them for spring shipment.

Lansing, Mich., 4/30/15.—I received the strawberry plants a week ago O. K. Every one is alive and growing and I picked the blossoms on Progressives yesterday. I want to thank you for the extras. They were fine plants, too. C. K. MERIAM.

Sullivan Co., Pa., 5/3/15.—Plants came April 30 O. K. in fine condition. Thank you for the trial sorts, etc. F. H. BALLARD.

Grand Isle Co., Vt., 5/3/15.—Can I get some Orem and Uncle Jim of you this fall. The plants you sent this spring arrived O. K. and were fine. S. W. MASHTER.

Chenango Co., N. Y., 5/5/15.—Plants O. K. For the 2 Standpat you sent 3. I divided one, so have 4 now. F. B. SPRAGUE.

Kalamazoo Co., Mich., 5/25/15.—I received the plants O. K. I haven't lost one that I got of you. Wish I had got acquainted with you earlier in the season. F. C. HOAG.

Grundy Co., Ia., 4/20/15.—Please forward enclosed order at once. Plants you sent before arrived promptly and were certainly fine. BEN BOLDT, JR.

Chaut Co., N. Y., 5/10/15.—The everbearers I got of you last spring done fine. Send inclosed soon as possible. HENRY C. ERICKSON.

Hamilton Co., Ind., 5/10/15.—Plants O. K. See order and remittance for more. JOHN IMBLER.

Alleghany Co., N. Y., 5/10/15.—See order for 500 more Superb. Former order to hand. A fine lot of plants, etc. F. N. DRESSER.

Montgomery Co., Pa., 5/10/15.—My order arrived promptly. Never saw such fine plants before. See order for more. MILTON R. WARNER.

Wayne Co., Mich., 5/10/15.—See order for more everbearers. Those you sent last spring—the Superb—bore moderately in the fall. Progressive bore heavily until the ground froze, with ripe and green berries to the last. JOSEPH GLADDING.

Calla, O., 5/4/15.—Send us 400 best everbearing strawberry plants. We are referred to you by the M. Crawford Co. THE TEMPLIN SEED CO.

Erie Co., 5/5/15.—Enclosed find order for myself and neighbors. I used to buy all my plants elsewhere, but find I get full better service and better plants of you. S. E. ABBOTT.

De Kalb Co., Ind., 4/22/15.—I received the 2000 Superb from you. Fine plants in fine condition. Better than others I had received. For check enclosed send me Progressive and Productive. W. C. DAY.

Eaton Co., Mich., 5/1/15.—Plants O. K. See order for 1000 more. FRANK BURRELL.

Washtenaw Co., Mich., 5/3/15.—Order for everbearers inclosed. The third order in three years. EMIL MILCER.

Richland Center, Wis., 1/18/15.—From the dozen Standpat I got of you last spring I have almost 200 plants which are the most healthy, rugged growers I ever see. I have grown nearly all the everbearers and so-called everbearers from the first, but Standpat is the largest and most productive of all. I wanted you to know how they have done with me. I will send you my plant order for spring later. HENRY B. BLACKMAN.

Jackson Co., Mich., 6/23/15.—The plants we got of you last spring all lived and are making rapid growth. FRANK G. HOLMES.

Trumbull Co., O., 5/19/15.—I received the plants in good time and every one growing fine. HERBERT ROWLAND.

Butler Co., Ia., 9/3/15.—How are the Standpat with you this year? Ours have made few runners, but have produced twice as many berries as any other variety. E. F. HERSEY.

Saratoga Co., N. Y., 4/28/15.—Enclosed find order and remittance. Thanking you for past favors and best plants I can buy, etc. W. D. MILLER.

Miami Co., O., 3/15/15.—Order inclosed. W. K. Martin, former nurseryman at Horatio, O., advised me to send to you. F. F. WASSAM.

Marshall Co., Ind., 5/14/15.—Plants received in excellent condition. See order enclosed, etc. NICK FLECK.

Belmont Co., O., 2/6/15.—See order enclosed. Plants we have had of you before were fine. A. J. LIVEZEY.

Oakland Co., Mich., 4/20/15.—Plants to hand in fine shape. See order and remittance for more. J. COWELL.

Mehaska Co., Ia., 4/22/15.—Plants were received in best possible condition. All fine plants. Thank you kindly for the Standpat extra. J. D. GUTHRIE.

Hardin Co., O.—Thank you for the extras and the plants were fine.
MISS ZORAH B. STARNER.

Oakland Co., Mich., 4/22/15.—Plants received in good shape and are looking fine. Thanks for the trial sorts. JAMES OLD.

Jackson Co., Mich., 4/22/15.—Plants to hand O. K. Thanks for promptness.
B. K. SMEDLEY.

Woodford Co., Ky.—The plants came yesterday. Thanks for extras.
J. W. CREUSHAW.

Miami Co., O., 4/15/15.—Plants to hand O. K., moist and in fine condition. Thanks for extras. LAURA McCLARY.

Allen Co., Ind.—Enclosed find order for Americus. We were much pleased with what we got of you last year. MRS. J. EMENHISER.

Madison Co., Ill., 4/10/15.—Progressive and Standpat to hand—fine plants. See order for Americus, etc. J. A. COMBS.

Duluth, Minn., 4/26/15.—It looks as though Progressive, and in my case others of the everbearers got of you some time ago cannot be killed by lack of care, and like the wild strawberry will grow in spite of us unless plowed up. See order for more Progressive and Superb. MRS. J. M. GRAHAM.

Grand Ledge, Mich., 4/15/15.—The strawberry plants to hand O. K. and extra count. Thank you. MRS. ELMER EDWARDS.

Clinton Co., Mich., 5/20/15.—The plants were received in excellent condition and are doing fine. Thanks for promptness and good service. GEORGE A. SUMNER.

Jackson Co., Mich., 5/12/15.—Plants to hand O. K. Thanks for promptness.
SAM FRIEND.

Pierce Co., Wis., 4/10/15.—Enclosed find check and order for plants. Those I got of you before were fine. ARCHIE NEYSTROM.

Erie Co., N. Y., 5/10/15.—I received the plants in fine condition. Thanks for kindness. MRS. W. M. KRUGER.

Wayne Co., Ind., 4/12/15.—Please send catalog. I may not want any plants this year, but you were recommended to us by Mr. Smith, from the office of the State Entomologist, and I want to get in touch with you. C. K. STEMPLE.

Denver, Colo., 11/15/15.—Plants came in fine condition. G. W. HOOVER.

Middlesex Co., Mass., 5/7/15.—The everbearing plants came two days ago in fine condition. JOHN TEMPERLEY.

Delaware Co., O., 6/18/15.—I have bought plants of you and know they are good. How soon can I get 700 Dunlap and 300 Warfield of you? E. A. HALLER.

Barry Co., Mich., 4/6/15.—I have mislaid your catalog; kindly send another and oblige. I have 1½ acres June varieties—and hope to sell at least \$200.00 worth of the fall berries this season. They are certainly the sellers at 15 cents per quart.
FRANK M. SMITH.

Broome Co., N. Y., 5/1/15.—I want to thank you for those extras. I received the plants several days ago in fine condition. O. E. WILSON.

Ellensburg, Wash., 4/30/15.—Plants to hand O. K. in good condition. F. I. MOFFET.

Lawrence Co., Ind., 5/3/15.—A good rain last night and all O. K. if plants come soon now, with such good plants as you sent before.

LATER.—5/7/15.—The plants came yesterday in fine condition—and fine plants. Thank you. H. H. CHASE.

Kelley's Yellow Dent Seed Corn

Selected Stock Grown Especially for Seed

Our corn is especially fine this year—well dried and sure to grow. No barren stalks. A 14 to 16 row dent growing extra long ears, ripened in 90 to 100 days. Very prolific; also much prized for ensilage. Ears tipped before shelling.

Price, per peck, 75c; per half-bushel, \$1.25; per bushel (56 lbs.), \$2.00; F. O. B. Leslie, Mich.
